Response to special motion to
Strike

29
FILED JUN '17 8 25 USC-ORP

The legislative purpose of the special motion to strike is meant to protect civil rights and not to protect "conspiracy against rights" 18 USC 241

The right to petition the government does not include perjury used in a court proceeding, false police reports, blackmail, interstate domestic violence, violating a protective order, extortion, intimidation, or breach of contract.

Under 17 USC 512 meagan had to swear under the penalty of perjury and under the jurisdiction of federal court that she is the owner of the copyright which she is not. She erroneously told a jury that the "unlawful dissemination of an intimate image gave her that copyright. She also told judge upon that I sent nude images to her workplace which was another lie. She told officer deunis that we had an agreement not to share the images, despite under oath admitting to sharing them herself. Said that she knew "that they would not spread it" despite the record showing it was spread for blackmail and she filed a duca against it. Also the agreement to "complete transparency" which she made twice and violated twice by first blackmailing me from publishing our chat logs, and second with a criminal complaint.
